FINAL EXAMINATION

TRIMESTER 3, 2015/2016

BFN1024 – PRINCIPLES OF FINANCE

(All sections / Groups)

1st JUNE 2016
9.00 a.m – 11.00 am
(2 Hours)

INSTRUCTIONS TO STUDENTS

1. This Questions paper consists of 8 pages with 2 sections *excluding* the cover page, formula and financial tables.

2. **Section A – 20 Multiple Choice Questions (30 marks)**
   Instruction: **Answer ALL questions**. Shade your answer in the OMR sheet provided.

3. **Section B – 4 Working Problems (70 Marks)**
   Instruction: **Answer ALL questions**. Write your answers in the Answer Booklet provided.

Section A: 20 Multiple Choice Questions (30 marks)

Answer all Questions.

1. A firm has a beta of 1.2. The market return equals 14 percent and the risk-free rate of return equals 6 percent. The estimated cost of common stock equity
   a. 6%
   b. 7.2%
   c. 14%
   d. 15.6%

2. When determining the after-tax cost of a bond, the face value of the issue must be adjusted to the net proceeds amounts by considering
   a. The risk
   b. The taxes
   c. The approximates return
   d. The floatation cost

3. Debt is generally the least expensive source of capital. This is primarily due to
   a. fixed interest payments
   b. the secured nature of a debt obligation
   c. its position in the priority of claims on assets and earnings in the event of liquidation
   d. the tax deductibility of interest payments

4. What is the name given to the model that computes the present value of a stock by dividing next year's annual dividend amount by the difference between the discount rate and the rate of change in the annual dividend amount?
   a. Stock pricing model
   b. Equity pricing model
   c. Capital gain model
   d. Dividend growth model

5. Capital budgeting is the process
   a. used in sell or process further decisions.
   b. of determining how much capital stock to issue.
   c. of eliminating unprofitable product lines.
   d. of making capital expenditure decisions

6. Standard deviation measures _____ risk while beta measures _____ risk.
   a. systematic: unsystematic
   b. unsystematic: systematic
   c. total; unsystematic
   d. total; systematic

Continued...

7. A project has the following cash flows. What is the payback period?

Year	Cash Flow (RM)
0	-46,000
1	13,500
2	22,900
3	8,400
4	5,600

a. 2.48 years
b. 2.59 years
c. 2.96 years
d. 3.21 years

8. 1/15 net 30 date of invoice translates as
   a. a 1 percent cash discount may be taken if paid in 15 days; if no cash discount is taken, the balance is due in 30 days after the middle of the month.
   b. a 1 percent cash discount may be taken if paid in 15 days; if no cash discount is taken, the balance is due 30 days after the invoice date.
   c. a 1 percent cash discount may be taken if paid in 15 days; if no cash discount is taken, the balance is due 30 days after the end of the month.
   d. a 1 percent discount may be taken on 15 percent of the purchase if the account is paid within 30 days after the end of the month.

9. _____ is the risk to the firm of being unable to cover operating costs.
   a. Total Risk
   b. Business Risk
   c. Financial Risk
   d. Diversifiable Risk

10. The capital asset pricing model:
   a. provides a risk-return trade-off in which risk is measured in terms of the market returns.
   b. provides a risk-return trade-off in which risk is measured in terms of beta.
   c. measures risk as the coefficient of variation between security and market rates of return.
   d. depicts the total risk of a security

Continued...

11. The _____ of a firm is the amount of time that elapses from the point when the firm makes an outlay to purchase raw materials to the point when cash is collected from the sale of the finished good.
    a. cash turnover
    b. cash conversion cycle
    c. average age of inventory
    d. average collection period

12. _____ projects have the same function; the acceptance of one _____ the others from consideration.
    a. Capital ; eliminates
    b. Independent ; does not eliminate
    c. Mutually exclusive ; eliminates
    d. Replacements ; does not eliminates

13. A firm can reduce its cash conversion cycle by
    a. increasing the average age of inventory.
    b. increasing the average collection period.
    c. increasing the average payment period
    d. decreasing the average payment period

14. The _____ is the rate of return required by the market suppliers of capital in order to attract their funds to the firm.
    a. yield to maturity
    b. internal rate of return
    c. cost of capital
    d. gross profit margin

15. Which of the following is not a capital component when calculating the weighted average cost of capital (WACC)?
    a. Long-term debt.
    b. Common stock.
    c. Accounts payable.
    d. Preferred stock.

16. The _____ the coefficient of variation, the _____ the risk.
    a. lower; lower
    b. higher; lower
    c. lower; higher
    d. more stable; higher

Continued...

17. The purpose of managing current assets and current liabilities is to
    a. achieve as low a level of current assets as possible.
    b. achieve as low a level of current liabilities as possible.
    c. achieve a balance between profitability and risk that contributes to the firm's value.
    d. achieve as high a level of current liabilities as possible

18. Your company's stock sells for RM50 per share, its last dividend (D_0) was RM2.00, its growth rate is a constant 5 percent, and the company will incur a flotation cost of 15 percent if it sells new common stock. What is the firm's cost of new equity, k_e?

    a. 9.20%
    b. 9.94%
    c. 10.50%
    d. 11.75%

19. Net present value is preferred to internal rate of return for capital budgeting decisions because
    a. The internal rate of return does not allow you to determine if the project is acceptable.
    b. the net present value is the only method that allows you to determine which independent project is acceptable
    c. The net present value allows you to compare mutually exclusive projects.
    d. The internal rate of return for a project is different for each firm.

20. A system for managing demand-dependent inventories that minimizes the amount of inventory on hand is called _____ inventory.
    a. materials planning
    b. kanban
    c. Keiretsu
    d. just-in-time

Continued...

Section B: Working Problems (70 marks).

Answer All Questions

Question 1

You are given the following information concerning Kesenai Landscapes Berhad:

Debt
8,500 8 percent coupon bonds outstanding, RM1000 par value, 25 years maturity, selling for 118 percent of par, the bonds make semiannual payments. Assume the company's tax rate is 35 percent.

Common Stock
225,000 shares outstanding, selling for RM87 per share; beta is 1.15.

Preferred Stock
15,000 shares of 5 percent preferred stock outstanding, currently selling for RM98 per share.

Market
7 percent market risk premium and 3 percent risk free rate.

i. Calculate the company's after-tax cost of debt.
(4 marks)

ii. Calculate company's after-tax cost of preferred stock.
(3 marks)

iii. Calculate the company's after-tax cost of common equity.
(4 marks)

iv. If the company's capital structure consists of 40 percent long-term debt, 40 percent common stocks, and 20 percent preferred stock, calculate the company's weighted Average cost of capital (WACC).
(4 marks)

(TOTAL: 15 MARKS)

Continued...

Question 2

(a) Adam Sdn. Bhd. is considering an investment in one of two ordinary shares.

Ordinary share 'Y'	
Probability	Return
0.20	10%
0.60	13%
0.20	20%

Ordinary share 'Z'	
Probability	Return
0.15	6%
0.30	8%
0.40	15%
0.15	19%

You are required to calculate the followings:

i. Expected return of ordinary share Y and Z. (4 marks)

ii. Standard deviation of ordinary share Y and Z. (6 marks)

iii. Which is a better investment? Explain. (2 marks)

(b) Lily Corporation's share has a required return of 13.00%, the risk-free rate is 7.00%, and the market risk premium is 4.00%. What is the beta for the company?

(3 marks)

(TOTAL: 15 MARKS)

Continued...

Question 3

Fine Press is evaluating a project that has an initial after-tax cost of RM5,000,000 and is expected to provide after-tax operating cash flows of RM1,800,000 in year 1, -RM2,900,000 in year 2, RM2,700,000 in year 3, and RM4,300,000 in year 4.

(a) Determine whether to accept or reject this project using:

i. The payback period if the required payback period is 2 years.

(4 marks)

ii. The Net Present Value (NPV) if the discount rate is 12%.

(5 marks)

iii. The Profitability Index (PI).

(4 marks)

(b) Is the Internal Rate of Return (IRR) method an appropriate method to evaluate this project? Why?

(3 marks)

(c) Explain why the net present value is considered to be the best method of analyzing an investment.

(4 marks)

(TOTAL: 20 MARKS)

Question 4

(a) Cempaka Berhad is concerned about managing its operating assets and liabilities efficiently. Inventories have an average age of 130 days, and accounts receivable have an average age of 50 days. Accounts payable are paid approximately 30 days after they arise. The firm has annual sales of RM50 million, its cost of goods sold represents 65 percent of sales, and its purchases represent 60 percent of cost of goods sold. Assume a 365-day year .

i. Calculate the firm's operating cycle (*OC*).

(2 marks)

ii. Calculate the firm's cash conversion cycle (*CCC*).

(2 marks)

Continued...

(b) Your firm has an average collection period of 34 days. Current practice is to factor all receivables immediately at 2 percent discount. What is effective cost of borrowing in this case? Assume that default is extremely unlikely.

(4 marks)

(c) Calculate the value of each investment opportunity below

i. Unggul Incorporated Berhad has issued bonds with a par value of RM1,000 and a maturity periods of three years. The yearly coupon rate offered is 10%. Rating Agency Malaysia (RAM) has given a rating of AAA to the bond of Unggul Incorporated Berhad. If the required rate of return is 13%, what is the market value for the said bonds?

(4 marks)

ii. Ordinary shares of Red Ruby Company that are sold at the price of RM1.80 had just paid dividends for RM0.25 and the dividends are expected to grow by 5% a year at a constant rate. The expected rate of return is 14%.

(4 marks)

iii. You own 150 units of preference shares of White Diamond Company. This share has just been sold at the price of RM3.85 per share and the annual dividend is RM0.35. Calculate the expected rate of return and if this required rate of return is 18%, will you sell or buy these shares?

(4 marks)

(TOTAL: 20 MARKS)

BFN1024 PRINCIPLES OF FINANCE

Selected Formulas

1. $NPV = \sum_{t=0}^{n} \frac{CF_t}{(1+r)^t} - \text{Co}$

2. $\text{E (R)} = \sum_{i=1}^{n} r_i \, P_i$

3. $\sigma^2 = \sum_{j=1}^{n} \left(r_j - \bar{r}\right)^2 \times P_{r_j}$

4. $WACC = (w_i \, r_i) + \left(w_p \, r_p\right) + (w_s \, r_s)$

5. $r_d = \frac{I + \frac{\$1000 - N_d}{n}}{\frac{N_d + \$1000}{2}}$

6. $OC = AAI + ACP$

7. $CCC = OC - APP$

8. $EOQ = \sqrt{\frac{2 \, X \, S \, X \, O}{C}}$

9. $DOL = \frac{Q \, (P - VC)}{[Q \, (P - VC)] - FC}$

10. $DFL = \frac{EBIT}{EBIT - I - (PD \, x \, 1/(1-T))}$
